# IBRAHIM AYMAN SAYED IBRAHIM

**Data Analyst | MIS & Business Intelligence | Power BI | SQL | Python | Advanced Excel | Reporting Automation**
**Awseem, Giza, Egypt | +20 1154759933 |** ibrahim.aysayed@gmail.com **|** LinkedIn

## PROFESSIONAL SUMMARY

Data Analyst & MIS Specialist with 3+ years of experience in Business Intelligence, operational analytics, workforce reporting, and process automation. Experienced in managing performance reporting across 13 client accounts, developing interactive Power BI dashboards, and optimizing reporting workflows using SQL, Python, Power Query, and Advanced Excel. Achieved up to 80% reduction in manual reporting preparation time while supporting operational environments maintaining SLA performance above 95%. Strong background in transforming complex operational datasets into actionable business insights, automating reporting processes, and supporting data-driven business decisions.

## KEY SKILLS

**DATA ANALYTICS & BUSINESS INTELLIGENCE:**
Data Analysis • Business Intelligence • Data Visualization • KPI Monitoring • Performance Analytics • Business Insights.
**PROGRAMMING & DATABASES:**
SQL • Python • MySQL • Data Extraction • Data Cleaning • Data Transformation • Data Validation • Database Management.
**POWER BI & DATA VISUALIZATION:**
Power BI • DAX • Power Query • Data Modeling • Dashboard Development • Interactive Reporting.
**ADVANCED EXCEL & AUTOMATION:**
Advanced Excel • Pivot Tables • Advanced Formulas • Power Query • Excel Automation • VBA.
**WORKFORCE & OPERATIONAL ANALYTICS:** RTM • Contact Volume Forecasting • Capacity Planning • FTE Calculation • Erlang C • SLA • AHT • Occupancy • Shrinkage • Attrition.

## PROFESSIONAL EXPERIENCE

### MIS Analyst | Raya Customer Experience (RCX) | 2025 – Present

- Manage operational reporting and performance analytics across 13 client accounts, delivering daily, weekly, and monthly reports to management and business stakeholders.
- Design, develop, and maintain interactive Power BI dashboards to monitor operational KPIs, including SLA, AHT, Service Level, Productivity, Occupancy, and Shrinkage.
- Automate recurring reporting workflows using Power Query, Advanced Excel, and Power BI, achieving up to 80% reduction in manual reporting preparation time.
- Extract, transform, validate, and analyze operational datasets from multiple sources to maintain reporting accuracy and data consistency.
- Monitor operational performance trends and identify KPI deviations, providing analytical insights to support management decision-making.
- Collaborate with Operations and Workforce Management teams to investigate performance gaps, resolve reporting discrepancies, and optimize reporting processes.
- Support reporting requirements across multiple operational channels, including Inbound, Outbound, WhatsApp, Digital, and Data Entry operations.

#### Key Achievements

- Managed reporting requirements for 13 enterprise client accounts, supporting multiple operational projects simultaneously.
- Supported operational performance monitoring across accounts maintaining SLA compliance above 95%.
- Reduced manual reporting preparation time by up to 80% through reporting automation and dashboard development.

**Workforce Planning & Capacity Planning** | Raya Customer Experience (RCX) | 2024 – 2025

- Analyzed historical contact volumes and Average Handling Time (AHT) to identify workload patterns and develop forecasting assumptions.

- Applied Erlang C to calculate staffing requirements based on forecasted demand and service targets.
- Calculated required FTEs by incorporating workload demand, occupancy targets, shrinkage, absenteeism, and attrition.
- Analyzed staffing gaps to identify understaffing and overstaffing risks.
- Supported workforce planning, scheduling, and shift coverage to meet operational demand.
- Monitored workforce KPIs, including Service Level, Occupancy, AHT, Shrinkage, Attrition, and Forecast Accuracy.
- Supported end-to-end workforce planning, including forecasting, capacity planning, staffing, and scheduling.

**Key Achievements**

- Contact Volume Forecasting | Erlang C | FTE Calculation | Capacity Planning | Shrinkage Analysis | Workforce Optimization | Interval-Based Staffing | Workforce Scheduling.

**Real-Time Management (RTM) Analyst** | Raya Customer Experience (RCX) | 2023 – 2024

- Monitored real-time operational performance, queue volumes, and agent availability to maintain service level targets.
- Managed schedule adherence, agent activities, and intraday workforce allocation across operational queues.
- Monitored real-time KPIs and identified performance deviations and operational risks.
- Coordinated with Operations to address staffing gaps and maintain efficiency.
- Prepared intraday performance reports and staffing recommendations to support real-time decision-making.

**Key Achievements**

- Promoted to MIS Analyst within approximately one year of joining the RTM function.
- Supported multiple operational accounts through real-time performance monitoring and workforce coordination.

**Customer Service Co-Leader** | Raya Customer Experience (RCX) | 2022 – 2023

- Supported Al Borg daily operations, ensuring procedural compliance and service quality.
- Assisted in monitoring team performance, agent productivity, and service quality against operational KPIs.
- Coached and supported new customer service agents to improve process knowledge and service delivery.
- Assisted Team Leaders in workflow management, performance monitoring, and operational coordination.

**Key Achievements**

- Recognized multiple times as Employee of the Month for operational performance and contribution to team objectives.

## PROJECTS

**POWER BI – Operational Performance Dashboard**: **Project1** , **Project2**

- Developed interactive Power BI dashboards to analyze operational performance and monitor business KPIs.
- Implemented Power Query transformations, data modeling to prepare structured datasets for reporting and visualization.

**SQL – Sales & Inventory Management Database: Project**

- Designed a relational MySQL database to manage sales transactions, product information, and inventory records.
- Developed SQL queries using JOINs, aggregations, filtering, and data manipulation techniques to generate business insights.

**PYTHON – RTM Data Analysis & Automation: Project**

- Developed Python scripts to process operational datasets and automate repetitive data preparation tasks.
- Applied data manipulation, cleaning, and validation techniques to improve reporting efficiency and data consistency.

## EDUCATION

**B.Sc. in Computer Science** | Al-Azhar University | 2026 | Very Good

## CERTIFICATIONS & ACHIEVEMENTS

COPC Certified • Power BI Training • SQL for Data Analysis • Advanced Excel • Python for Data Analysis
Data Analytics Professional Courses • Employee of the Month – Multiple Recognitions

## LANGUAGES

Arabic: Native | English: Intermediate (B2) | Working proficiency in professional reporting
